

Stuff like this is what makes people hate the government, politicians and the legal system! So let me get this straight... the NAB wants to prevent me listening to local information, that can be helpful??? I don't listen to the TV in my car, I don't listen to the AM/FM radio in the car; and to be honest, I don't have every station memorized on the east coast to get local info while traveling.

LEAVE MY XM RADIO ALONE! They provide an excellent service and I only want it to get better. If NAB wants to help, tell them to have their "clients" get in the game and \*compete\* instead of attempting to take \*our\* ball and going home with it. Forcing me to get my info from sub-par sources is absolutely stupid, and I hope you realize this!
